MEMORANDUM

TO: Board of Directors
FROM: Vicky Kyriaco, General Manager/CAO
DATE: November 10, 2014
RE: **Bell Time Review**

Background

As part of the Ministry's Efficiency and Effectiveness review, OSTA is conducting a system-wide bell time review. The goal of the review is to align bell times in such a way as to allow tiering of bus runs to increase capacity utilization, while balancing the needs of each school community. In January 2014, OSTA staff presented the OSTA Board and OCDSB/OCSB Trustees proposed bell time changes based on internal feedback of principals and superintendents. This report was subsequently revised in February 2014, showing a few changes/corrections. Both reports have been available online on OSTA's website since then.

OSTA's Bell Time Management Policy T19 stipulates that the OSTA Board of Directors has the authority to approve bell time changes of 10 minutes or less, with appropriate consultation. Any changes over 10 minutes must be approved by the school board Trustees.

This report presents recommendations for changes of 10 minutes or less for approval by the OSTA Board. This report also presents the proposed recommendations for changes expected to be presented to both school boards in January 2015.

Current State

Key Considerations

OSTA staff acknowledges that change is difficult in any family setting. There are many different and unique circumstances which exist and which should be taken into consideration by staff. Finding the greatest cost savings is not the ultimate goal, although the outcome of this exercise will result in some savings for both school boards. The point of the review is to investigate and evaluate the potential for savings, and the decision as to whether to proceed or not will be made based on a multiple of factors, and not just on the cost savings.

- 1) Standardized bell times allow run tiering in most circumstances, and simplifies future assignment of bell times.
- 2) Changes affect families in the following ways:
 - a. late(r) arrival to work
 - b. new additional daycare costs or problem with childcare (either daycare availability or sibling care)
 - c. issues with timing of OC Transpo bus routes

- d. getting children to 2 or more different schools
 - e. affects extra-curricular activities
- 3) The number of feedback surveys received was not the only parameters used in the decision-making process. Sometimes a single item within the feedback could influence the decision not to make a change. All feedback was reviewed.
 - 4) The number of walkers vs students transported could also influence the decision. OSTA does not believe it is in the school community's best interest to disrupt a majority of students in a school only to save a relatively small number of buses.
 - 5) Changes to the walk zone and hazards, or school programs, that create an added layer of complexity to re-establishing families' routines.
 - 6) OSTA is proposing to change 26 schools from 9:00 to 9:15. Currently, 30 schools have bell times in the 9:05 – 9:30 range.

Barrhaven was not part of this review as they underwent a bell time review with changes that were implemented in 2010. Barrhaven will be undergoing a bell time review and public consultation during the 2015-16 school year for implementation in September 2016.

Consultation

Feedback from stakeholders was collected in the following ways:

1. GM/CAO presented or met with parent council presidents, school board staff, Trustees, City Councilors, and City Staff over a period of two years, and shortly prior to public consultations began
2. Survey, available online or in paper form at public consultation (2119 received, cross-referenced with emails)
3. Q&A at public consultations (25 sessions on Tuesday, Wednesday, Thursday or Saturday – poor attendance)
4. Via email, special delivery or regular mail

OSTA's communication regarding the transformation project and public consultation included:

1. Ads in local community papers at least 2 weeks prior to each consultation
2. Special transformation page on OSTA's website with blurb on home page, all reference material, link to survey, etc
3. GM/CAO presentations and communication with key leaders and stakeholders
4. 2 different hardcopy and electronic newsletters for schools to send home with students

Public consultation closed on July 15 2014.

This report will be posted online on November 12 2014 and feedback@ottawaschoolbus.ca will be made available to the public for additional comments until Monday December 1 2014. Email feedback should:

- a) Show the name of the school in the subject line
- b) Contain the person's full name, address and contact information

Feedback collected between November 12 and December 1 may be used by OSTA staff to alter final recommendations going to OCDSB/OCSB in January.

Further communication about final bell times will be sent to school communities in January and throughout the rest of the year. implementation is scheduled for September 2015.

Financial Considerations

Each area represents a grouping of buses which are interdependent and used to service a number of different schools within the area. In order to maintain the potential efficiency of each area, OSTA staff recommends that Trustees leave areas intact wherever possible.

The original bell time review report presented in January 2014 demonstrated a potential savings of 115 buses or \$3,392,500. The new recommendations based on public feedback are now showing a savings of 93 buses or \$2,743,500. This number may change slightly with the finalized walk zone maps. Removal of schools within areas is likely to affect efficiency savings, although OSTA staff will endeavour to find ways to incorporate such changes to maximize efficiency wherever possible.

Approval Process and Timelines

November 10 2014	Report to OSTA Board of Directors for approvals of bell time changes of 10 minutes or less Draft of Proposed bell time changes of over 10 minutes will also be presented
November 12 to December 1 2014	OSTA report posted on www.ottawaschoolbus.ca and feedback@ottawaschoolbus.ca open. Feedback collection closes on Dec 1 2014
January 6 2015	Report to OCDSB COW re: proposed bell time changes over 10 minutes – OSTA GM/CAO and AGM will be present at COW to answer questions
January 13 2015	Report to OCSB re: proposed bell time changes over 10 minutes – OSTA GM/CAO and AGM will be present to answer questions
January 27 2015	Reports to OCDSB and OCSB Boards of Trustees for final approval of proposed bell time changes.

St Matthew HS	8:35	8:00	8:35	0

School population: 955
Students transported: 645
Feedback received: 56

Comments: During public consultation, it came to light that St Matthew has a credit music program in the morning that occurs prior to bell time. A significant change would have effectively eradicated that program. In addition, St Matthew's walk zone is set to change with the removal of a hazard at the Queensway (there is now a fence prohibiting at grade crossing). this will increase the number of students walking to school.

 Feedback received: 25

Comments: Many comments regarding difficulty for students to get after school part-time jobs and competition with St Peter HS students for those jobs. Given the larger ratio of walkers to students transported, changing the times for all students to save a few buses is not effective for that school.

Comment: Special program for students with special needs draws from a number of schools in the area for morning or afternoon classes. There was some concern expressed about class time being affected. However, the feeder schools are also changing to a similar time so this should not affect class time. OSTA may also transport students between program and home rather than transporting to home school and again to program.

Comments: Feedback from Rockliffe Park indicates an overwhelming difficulty with this change in terms of parents getting to work. What makes the circumstances more challenging is a reliance on OC Transpo for transportation. The timing of routes public transit routes changes substantially after 9am. OSTA's proposed change of 45 minutes is significant for a school community and one that is not acceptable to a majority of stakeholders.

Comments: Feedback related to the difficulty of getting to work on time and the additional costs for daycare. Some concerns regarding additional traffic on Smyth Rd at 8:30am rather 8:00am was expressed. OSTA reviewed walk zone maps and determined that traffic counts were no more or no less significant in that area at the different times than in other similar areas.

Comments: Feedback related to the difficulty of getting to work on time and the additional daycare costs. A request was made to translate documents into various languages which OSTA attempted to accommodate. The expectation is that schools who understand the language barriers of their families and who had access to translator services through the school board, would be better positioned to provide support to any families seeking information about the changes. Operationally, these buses are consistently at the latest end of the window or slightly late for the afternoon pick up at the school.

Comments: Feedback relates to walkers and timing for parents to get to work. Currently 62% of the current student population walks. This number will increase with the implementation of the new walk zone. In addition, this school community was part of the Near West Review and will be experiencing program boundary changes. Given the other changes scheduled to occur, OSTA does not recommend a bell time change at this time.

School population: 324
Students transported: 281
Feedback received: 1

Comments: This school community has many economic and social challenges. Attendance management is difficult and students are often late. An earlier bell time would make attendance management even more challenging.

Kars on the Rideau	8:15	9:15	8:00	15

School population: 710
 Students transported: 631
 Feedback received: 108

Comments: The change was considered too drastic. Feedback related to late arrival for work and long commuting distances making this more of a challenge. School community preferred an earlier bell time. The new proposed bell time, although not leading to the same efficiencies as 9:15, will still lead to some efficiencies while allowing commuting time.
